

Bernardo António Borda d'Água

FULLSTACK ENGINEER · PLATFORM ENGINEER

ABOUT ME

Fullstack & Platform Engineer based in Lisbon with experience in backend development, DevOps, and cloud infrastructure. Primarily working with Rust, Python, TypeScript, and Go, with a strong foundation in software engineering fundamentals that allows for quick adaptation to new languages and technology stacks. Track record of taking early-stage prototypes to production-ready systems, bridging the gap between Data Science and engineering, and mentoring teams on best practices.

	<ul style="list-style-type: none">I worked on various internal projects, providing technical expertise to stakeholders and implementing PoCs.I developed a computer vision pipeline, taking an abandoned PoC to a production-ready product. From a monolithic approach to step-driven micro-services approach, allowing each step to be independently cached and retried, and one step (inference) to run on-prem. This ended up speeding the process 40x, though I had to throttle it to fit our cloud's quotas. I took point on this project, taking on: stack choice, early architecture/iteration, development, CI/CD and deployment. Built with Rust, Python and PostgreSQL, interfacing via gRPC and GraphQL.I collaborated closely with Data Scientists, taking their work (mostly Python) from experimental, ad-hoc pieces of code to deployable PoCs or maintainable production code. I take pride in having introduced best practices to the team, leveraging type hints, relying on Rye, and getting all of our PoCs to be fully self-sufficient Docker images that can be tested across the company.

06/2025	CLIMATESEED (HN SERVICES CONSULTANT)	☒ LISBON/REMOTE
	<ul style="list-style-type: none">I worked on a backend codebase, that was being migrated from Ruby on Rails to Rust.I worked, briefly, on a Vue frontend.I developed the major features for the backend, and big technical changes (switching http framework, as an example). I also contributed to PR reviews and mentored colleagues who were less proficient in Rust and were less aware of the crate ecosystem.
